

Polygamy vs. USG Pocketbook

by R.E. Sutherland, M.Ed./sciences

The final fact arrived that has been absent from discussion about the polygamist compound arrived via FoxNews at 07:10 a.m. this morning.

The question was: “Did the children of the polygamists have birth certificates?”

The answer is: “No.”

Why is that important?

Another religious organization actively pursued the meaning of the birth certificate in the 1990s. One person observed that his original birth certificate on file with his state's government had been stamped with ink on the back with names of several different countries. He was not allowed to have a photocopy of either side of his birth certificate. He began to ask questions.

After a long investigation and many other organizations working together, here are the sordid facts that came to light:

1. After the USA bankruptcy in 1929, the government secretly reorganized the monetary system of the United States Government [USG} under a Federal Corporation, which is documented in U.S. Code, Title 28, Section 3001-3002.
2. The United States Government no longer owns the land, because the bankruptcy and unpaid bills from long ago defaulted to the King of England, there had to be another form of collateral for the new money.
3. “Human energy” was the new collateral. Gold and silver were no longer needed.
4. To hide the truth from its citizens, the USG created a mirror image of each citizen. The federal image (i.e., public) would have a name written in capital letters. The real person (i.e., private) would have a name written with capital and small letters.
5. The birth certificates are like car titles. They are the title to a person's energy which is captured by the Federal Corporation upon birth. Of course, it is legally performed by an unsuspecting mother who is asked by hospital officials to sign the title and come into a contractual agreement with the state where the child is born.
6. **IMPORTANT FACT:** The father of the child is never asked nor allowed to sign the birth certificate. His is not considered an owner of the child's energy. Only the mother is a player in the Federal hoax. The mother grants Holder-In-Due-Course to the USG for her own child's energy.
7. The birth certificate is then sold on the international monetary markets for approximately \$1 million.

8. The Social Security Number is also a document that is sold on the international monetary market for approximately \$640,000.

9. Morality is a non-issue in federal and state government decisions concerning children. For example, fornication is also forbidden on most state laws; however, young women are allowed to spawn multiple offspring without repercussion and are given shelter, income, advanced education, and day care privilege for their children. Again, morality is not an issue.

10. Therefore, the USG knew for many years that children were born to parents inside the polygamist compound, and it did not arrest anyone for polygamy. Therefore, moral issues are not at play in this incident.

Morality is an excuse to perform terrible things to children at the expense of the parent. Pedophilia and prostitution are among those terrible things. An Oregon couple proved this with years of research and documentation, which was presented to the US Navy long ago.

11. What is happening at the polygamist camp is a harvest of uncertified human energy. If 421 children are given birth certificates, signed by the mothers, then they are worth approximately \$421 million on the international monetary markets. Then add to that the Social Security numbers, which will be assigned to each child, and then put them up for sale. The USG is making a wonderful profit.

12. The DNA samples, which are now being extracted from the traumatized children, will establish the father-to-child connections. The state government will demand that the children go to foster care, which will generate approximately \$30,000 per child from the government and the father will be forced to pay child support on top of that tidy sum.

13. The United States Government does not have morals. It ignores the Ten Commandments. Instead, it operates a money flim-flam from the top-down against its own citizens.

14. The human energy of USG citizens is owned by other foreign countries. It remains to be understood what will happen to the person when the USG declares bankruptcy. Will those persons become slaves to a foreign government?

15. Every mother who signs a child's birth certificate is selling her child to the Devil (i.e., USG) for which there is no Redemption.

16. What foreign country owns your energy?

The truth is right here in this article. Believe it. There is plenty of documentation.
